

GIUSEPPE LOVECCHIO

has over 30-years hands-on experience of supply chain, operations and project management activities, working from 1990 to 2004 in multi-cultural and complex global corporations in Europe and America, as supply chain director and deputy managing director (AlliedSignal, Bosch, Alstom). He founded the firm Lovecchio Consulting in 2005, performing an intense activity for the successful application of supply chain and operations solutions, with proven results (lean manufacturing implementations; process improvements through TOC, Lean Six Sigma, Total Quality; warehouse design and inventory reductions).

He is an APICS Master Instructor since 2011, Subject Matter Expert for APICS CLTD & CSCP learning systems, Demand Driven Endorsed Instructor, Qualified business instructor EQF7 European grade, and author of various articles.

His primary focus is on the systemic and pragmatic deployment of the business strategy in strategic, tactical and operational results, through a transparent, collaborative and productive approach.
